

TABLEHUB

# Serve your content direct to the table

From simple table numbers to cued custom content, **TableHub** brings dynamic motion graphics and design to every table. Wireless and individually controllable, **TableHub** will work for all sizes of dining and award events to uniquely add interest to every table.

Applications could include award titles, sponsor and event branding or set and forget a loop for the entire evening with no need for control systems.

## Dimensions

## F.A.Q.

### So what exactly is TableHub?

**TableHub** is a digital table centerpiece that has the ability to show custom digital content (pre-recorded videos, images, motion graphics etc.) across 4 digital screens at your table.

Each unit is wireless and individually controllable allowing you to enhance your audiences experience.

### What content can we put on TableHub?

Table Numbers, Menus, Videos, Photos, Powerpoint Slides, Sponsor Loops and More.

### Do I need wireless internet setup in my venue to make it work?

No, **TableHub's** run on an independent network setup by our team.

### Do you provide crew to run TableHub at my event?

Yes, an experienced tech will be there from start to finish.

### Is there a minimum order for TableHub's at my event?

You can have only one table hub if you want but our minimum fee is for 10 table hubs.

### What do I get as part of hiring TableHub?

Our standard package includes setup, operation and packdown of **TableHub**, with an event operator looking after you from start to finish. Our team can create an abundance of custom content specific to your event requirements Additional fees apply.

### What regions does TableHub deliver to in New Zealand?

**TableHub** has a number of teams setup to deliver services to every region across New Zealand. As long as we can get there, we'll make it happen.
